

Creating my Green Project

Name of project

..... MIAA - MAKE IT ALIVE AGAIN

Kind of the project or Business Idea

This can be a KA152 (Youth Exchange), KA153 (Training course like this one)
KA154, KA210 or a KA220 project

..... KA 220

Main Aim of the project

What will be your main Aim? Why you want to implement this project? Describe the primary Main Aim and the creative aspect of your project

The main aim is to give a chance to ^{natural} places after destructions or abandonment to renovate / rebuilt / re-plant & have a life again in the community. Also to give a chance to the community to connect with Nature, give a meaning to the place & ~~re~~ involve them to the renovation. So by that we give a chance to the place, remake a Natural Place & benefit the community around the place in many ways

Small Description of the Project

In simple terms, describe what will you do with your project and how you will do it

Each country out of 5, will decide each one an area that has suffered from destruction or an abandoned area with poor life. After choosing the areas the representatives will make a research on the potentials of the areas with experts & plan a program of possible solutions. The Community will be asked to be involved & participants from the Erasmus project, & in two yrs we are going to fulfill the transformations

Describe the management aspect of the project

Who is going to organize, what are the responsibilities of each responsible party?

The organizations will be out of 5 countries. The responsibility of each country (Poland, Greece, Cyprus, Portugal & Lithuania) is to research, organize, & maintain the work in the chosen area. And the experts & the participants is parallel time

What is the goal or objective of your project/business idea?

If it's a KA220 project, what will be your final product?

- The goals are:
- Give chance to destroyed / abandoned places to get life again
 - Motivation to community for re-connection to nature
 - Give life to community through nature

Partnership of the Project

If it's a KA152, KA153, KA154, KA210 or KA220 then

Which organizations are going to take part?

How many people per organization will be involved?

What will each organization do? i.e. what do they excel at, so they can contribute the most?

What will be the responsibilities of each organization?

Who will be the central organization? Why?

If it's a business idea

What will be the roles of each person in your business? How many people do you need to run the business?

With what other business, organizations will you be involved in?

Where will you receive funding from? (Think locally such as municipalities or other forms of funding!)

How will you be able to grow your organization?

- SLC Lithuania Applicant
- ACPOLIA Cyprus
- Starachowice Poland
- Municipality of Valongo Portugal
- Hellenic Ergotherapy Society (Associate partner)
- Municipality of Apollonias

Strengths, Weaknesses, Opportunities, Threats

Name of project: *Make it alive again! (MIAA)*
Type of project: *KA 2020*

Strengths

If it's a **project** What are the strengths of your Project?
What are your good points that you will promote?
Your advantages compared to others?

If it's a **business idea** What are the strengths of your business?
How do you differ from other businesses that currently exist in the market?
What unique resources, skills or expertise does your business have?

- *Positive influence on environment/nature/destroyed places*
- *Intercultural / integration*
- *Motivation of community to act for nature / responsibility for local network*
- *Building emotional connection between humanity & nature*
- *Spreading awareness of impact of people on nature & vice versa*

Weaknesses

If it's a **project** What are some weakness of your program?
What are some things that you may not manage to do during the lifetime of the project?
How will you manage this?

If it's a **business idea**
What could competitors potentially do better than you?
Are there any external perceptions or factors that could hurt your brand?

- ~~*too limit (is it?)*~~
- *Effort that might be a lot - (physical effort work & special skills)*

Opportunities

If it's a project What are some opportunities that you will have?

How will you have access to these opportunities? How can you take advantage of them?

If it's a business idea What are some gaps the market has that you could use?

What are some current trends in the market that you can take advantage of?

What are some emerging tech or platforms that could help you grow?

Who can you partner up with maybe?

- Promoting reuseage / circular economy
- Impact on youth to change their minds from throwing waste to fix it
- Inspiring others to create similar things/projects
- Teaching youth that good things take time & hard hard days off
- Using efficiently materials
- Promoting recycle
- Sponsorship from municipality
- Making community alive
- Enrich cv of the youth

Threats

If it's a project What are some external factors (political/social) that may affect your project?

What are some risks that may show up?

How might you deal with uncooperative partners?

If it's a business idea What are some external factors (financial/political/social) that may affect your business?

Are there any competitors who could catch up with you to take market share?

How might changes in tech/laws or regulations impact you?

What happens if customer preferences change?

- Not commitment of the youth to the project
- Community might not be cooperative
- Bureaucracy getting permissions/licenses
