Creating my Green Project

Name of project
..... Eco circle of my future

Kind of the project or Business Idea
This can be a KA152 (Youth Exchange), KA153 (Training course like this one) KA154, KA210 or a KA220 project
..... KA210

Main Aim of the project
What will be your main Aim? Why you want to implement this project? Describe the primary Main Aim and the creative aspect of your project
..... Develop awareness of Circular Economy
..... among Primary school children
.....
.....
.....

Small Description of the Project
In simple terms, describe what will you do with your project and how you will do it
..... • Create a Curriculum
..... • Organise Teacher's training
..... • Create a website including the material
..... of the project
.....
.....

Describe the management aspect of the project
Who is going to organize, what are the responsibilities of each responsible party?
..... • The partnership of five countries
..... • The responsibilities are explained in the
..... project management section
.....
.....

What is the goal or objective of your project/business idea?

If it's a KA220 project, what will be your final product?

To educate primary school pupils about circular economy.

Partnership of the Project

If it's a KA152, KA153, KA154, KA210 or KA220 then

1. Which organizations are going to take part?
2. How many people per organization will be involved?
3. What will each organization do? i.e. what do they excel at, so they can contribute the most?
4. What will be the responsibilities of each organization?
5. Who will be the central organization? Why?

If it's a business idea

What will be the roles of each person in your business? How many people do you need to run the business?

With what other business, organizations will you be involved in?

Where will you receive funding from? (Think locally such as municipalities or other forms of funding!)

How will you be able to grow your organization?

1. One primary school in five different countries
2. Five people per organization
3. For each country/organization we need:
 - (1) A Teacher trainer
 - (2) A specialist on Circular economy
 - (3) Three teachers per country to participate in the training course
 - (4) One co-ordinator per country

Strengths, Weaknesses, Opportunities, Threats

Name of project: ELO guide of my future

Type of project: KA210

Strengths

If it's a project What are the strengths of your Project?

What are your good points that you will promote?

Your advantages compared to others?

If it's a business idea What are the strengths of your business?

How do you differ from other businesses that currently exist in the market?

What unique resources, skills or expertise does your business have?

- (1) We work online - always available
- (2) Five different countries participate with different experiences, approaches and school systems
- (3) The project is aligned with EU policies
- (4) ~~we~~ Combine different attitudes in the outcome

Weaknesses

If it's a project What are some weakness of your program?

What are some things that you may not manage to do during the lifetime of the project?

How will you manage this?

If it's a business idea

What could competitors potentially do better than you?

Are there any external perceptions or factors that could hurt your brand?

- We have a small budget
- There will be a language barrier among participants

Opportunities

If it's a **project** What are some opportunities that you will have?

How will you have access to these opportunities? How can you take advantage of them?

If it's a **business idea** What are some gaps the market has that you could use?

What are some current trends in the market that you can take advantage of?

What are some emerging tech or platforms that could help you grow?

Who can you partner up with maybe?

Teach younger generation for a better future.
Spread in many EU countries
Municipalities can be partners to
promote the project
Have better educated teachers on
Circular Economy.

Threats

If it's a **project** What are some external factors (political/social) that may affect your project?

What are some risks that may show up?

How might you deal with uncooperative partners?

If it's a **business idea** What are some external factors (financial/political/social) that may affect your business?

Are there any competitors who could catch up with you to take market share?

How might changes in tech/laws or regulations impact you?

What happens if customer preferences change?

Difficulty in finding teacher
payer to be trained
Not enough budget to disseminate and
support over the entire of our project

Monthly program of project with title: **Eco Circle of my Future**
